1992 - present DAVID STROM, INC., ST. LOUIS MO

President. Consultant, professional speaker, freelance writer, podcaster, video blogger and editor. Create content for new Web sites and manage editorial processes, lecture at industry events, and review software and hardware products. Practice areas include security, networking, Internet applications, and wireless communications. Contributing editor; freelance business technology writer and product reviewer for dozens of technical and general interest publications including the New York Times. Consulting clients include IBM, Nvidia, Sun, Novell, Intel, Microsoft, Oracle, Tibco, Broadcom, and HP.

2007 DIGITAL LANDING.COM, MIAMI FL

Editor-in-chief. Supervised a staff of a dozen freelancers and two copy editors to produce more than 100 original editorial articles of a new Web site geared towards consumers buying new broadband Internet lines. Scheduled editorial, worked with production staff to design and implement CMS, and wrote several articles. Managed service providers and partners.

2005 TOM'S GUIDES PUBLISHING, WESTLAKE VILLAGE CA

Editor-in-chief. Supervised a staff of ten editors and 40 freelancers to produce the editorial content of eight Web sites of the largest independent international consumer-electronics and computing reviews online publisher. Streamlined operations, developed new targeted sites, managed service providers and partners, set editorial calendar, assigned and edited stories, wrote dozens of articles, coordinated trade show and events coverage, and created briefings for sales force. Staffed and launched four new sites under the "Guru" series and reworked content management system to handle expansion.

2002 - 2004 CMP MEDIA, MANHASSET NY

Online Editor, Electronics Group (2004). Supervised a staff of six editors and several freelancers to produce the editorial content of over 15 Web sites such as eeTimes.com, Planet Analog, and Embedded.com. Collaborated with CMP corporate IT staff and internal Web development teams to hire staff and launch four new sites under the "DesignLine" series, streamlined operations and restructured content.

Technology Editor, VARBusiness Magazine (2002-2004). Wrote two or more articles per week about networking, computer security, Internet applications and other technical topics for bimonthly trade magazine with over 100,000 circulation. Tested and evaluated hundreds of computer security and networking products per year. Managed a staff of three writers and a dozen freelance contributors, set editorial direction and coordinated art and infographics for feature stories. Lectured on these topics at ten computer-related conferences a year.

2002 CW POST, BROOKVILLE, NY

Adjunct faculty. Taught introductory graduate school business technology class (part-time).

2001 - 2002 PORT WASHINGTON SCHOOLS, PORT WASHINGTON NY

Teacher. Taught high school computer science class on networking basics to 11th and 12th graders using the WestNet/3Com NetPrep sequence of courses (part-time).

1990 - 1992 NETWORK COMPUTING MAGAZINE, CMP MEDIA, MANHASSET NY

Founding editor-in-chief. Hired and managed entire editorial staff of twenty, set editorial direction, and managed multi-million dollar budget of leading networking monthly trade magazine. Wrote and edited dozens of articles, including a monthly column. Designed a series of networked test laboratories for reviewing products. Gave speeches and represented magazine at industry events, worked closely with sales team to represent editorial scope and direction of publication.

1987 - 1990 PC WEEK, ZIFF-DAVIS PUBLICATIONS, BOSTON MA

Executive editor. Managed staff of 15 for reviews department of weekly industry trade magazine and managed multi-million dollar budget. Set editorial scope and edited various sections including editorials, columnists, and product reviews sections. Created corporate partners program and head-to-head product "shoot-outs." Wrote weekly networking column and over 300 articles.

1984-1986 TRANSAMERICA OCCIDENTAL LIFE INSURANCE, LOS ANGELES CA

Information center consultant. Worked with end users to support desktop computing applications, including networking, databases and spreadsheets. Installed first local area network in corporation. Developed corporate personal computing policy and product standards. Tested hundreds of new products and recommended them on suitability for overall corporate use.

1983 - 1984 US DEPARTMENT OF AGRICULTURE, WASHINGTON DC

Information center consultant. Worked with end users to support a wide variety of computer applications. Install, test, maintain and update all hardware and software in government-sponsored microcomputer information center. Developed curricula and taught weekly courses on spreadsheets, operating systems basics, and asynchronous communications.

1981 - 1983 OFFICE OF TECHNOLOGY ASSESSMENT, US CONGRESS, WASHINGTON DC

Analyst. Energy Program. Wrote research papers and supervised independent contractors.
